SIGN COMPANY

A DIVISION OF LOWEN CORPORATION

Signs That Mean Business®

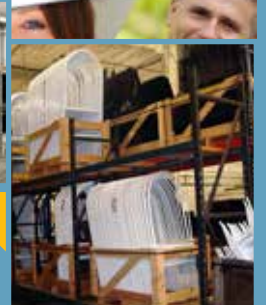

1970s

Expand production space and continue to advance as technology improves.

1989

Purchase the first 3M Scotchprint digital press offered allowing clear, defined agent photos on signs.

1950

Lowen Corporation is founded in 1950 in Hutchinson, KS

1960s

Start printing decals on vinyl film
Purchase a roller coater for clear coating.

1986

Four color process screen printing becomes standard as technology advances from 1950-1986.

1987

Robotic welding, automated fabrication and powder coating become standard. Products produced faster at higher speeds.

1990s

Gain efficiency. Increase capacity. Digital printing more cost effective at higher quantities.

2000

Lowen Sign Company is now accessible at lowensign.com

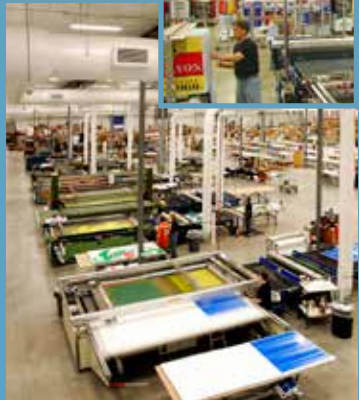

2006

Innovation provides customers ability to view signs exactly as they will be printed. New digital printing direct to rigid substrates.

2007

Move into our new 300,000 sq. ft. state-of-the-art production and office facility.

2015

New cutting-edge equipment continues to provide the high quality customers have come to expect since 1950.

2010

Social media sites are launched.

RESIDENTIAL/COMMERCIAL

Lowen Sign Company can meet all your residential real estate AND commercial real estate sign needs. Our high-quality standards will be met in simple yard sign units and on large steel panel signs for a commercial lot. Our goal is to meet any sign need.

SUBSTRATES

ALUMINUM - A good choice for coastal areas as it will not rust. Powdered coated for a glossy finish.

STEEL - Powder coated to prevent rust and produce a glossy finish. A strong material for the highest quality sign.

POLYETHYLENE - Durable and lightweight material that will not corrode. Bowing may occur in extreme temperatures or after long use.

STYRENE - This lightweight alternative to poly is a good option for hanging signs.

CORRUGATED PLASTIC - Rigid panels that can be printed single or double-sided. Our most economical option.

VINYL BANNER - High-quality vinyl with sewn hems and metal grommets. Use indoors and out.

FENCE MESH - The perfect product for builders and job sites. Screen the mess of construction and display a custom message on this durable material.

OMEGABOND - Very strong but lightweight substrate produced by bonding two aluminum sheets to a polyethylene core.

ALUMALITE - A strong aluminum composite panel with a high-density, corrugated polyallomer core.

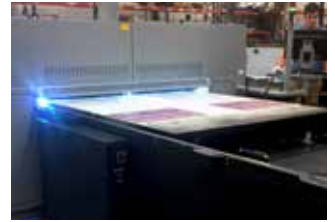

SERVICE

- People. Our people are what makes our service to you great
- No machines. An expert Customer Service Representative always answers the phone
- Orders tracked from start to finish to meet our quality standards
- Skilled Sign Artists Create custom artwork
- Questions? Call or e-mail and we will make it right
